2004)	

Form PCT/ISA/237(Box No. I) (January 2004)

International application No. PCT/US05/07201

Box No. V Reasoned statement under Rule 4 applicability; citations and explan	43 bis.1(a)(i) with regard to novelty, inventive step or industrinations supporting such statement	al 
1. Statement		
Novelty (N)	Claims 19 and 20	YES
Novemy (11)	Claims 1-18 and 21-35	NO
Inventive step (IS)	Claims NONE	YES
	Claims 1-35	NO
Industrial applicability (IA)	Claims 1-35	YES
	Claims NONE	ио

## 2. Citations and explanations:

Claims 1-18 and 21-35 lack novelty under PCT Article 33(2) as being anticipated by DAY (US 4,789,501). DAY discloses an implant for radiotherapy comprising a resorbable glass matrix and a radioactive isotope, as claimed, see columns 2-3. The glass matrix comprises phosphate materials with alumina, etc., in amounts encompassed by the claims, see column 5. The radioactive isotope includes Y-90, etc., see column 6. While the invention of DAY includes the use of stable isotopes and irradiation, this is only one includes of the DAY, but is not required. DAY also discloses methods of making the implants that do not use irradiation, see columns 2 and 8-9

Claims 19 and 20 lack an inventive step under PCT Article 33(3) as being obvious over DAY (US 4,789,501) in view of CONIGLIONE (US 6,589,502). DAY discloses an implant for radiotherapy comprising a resorbable glass matrix and a radioactive isotope, as set forth above. DAY fails to specifically disclose the use of a biopolymer delivery vehicle as claimed. CONIGLIONE discloses implants for radiotherapy and teaches that various biopolymers (as claimed) provide the advantages of enabling the implants to be formed in a desired size and shape and providing a predetermined rate of biodegradation, see abstract and Table I, column 22. It would have been obvious to one of ordinary skill in the art to use a biopolymer delivery vehicle for the implants of DAY to provide the advantages taught thereby in the art by CONIGLIONE.

Claims 19 and 20 meet the criteria set out in PCT Article 33(3), because the prior art does not teach the implants as claimed having a glass matrix and a biopolymer delivery vehicle.

Claims 1-35 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
